

A solid green vertical bar is positioned on the far left side of the image, extending from the top to the bottom.

WHAT IS?

CUCUMBER & GHERKIN

Gherkin is a language that Cucumber understands.

It is a Business Readable, Domain Specific Language that lets you describe software's behaviour without detailing how that behaviour is implemented.

Popular Keywords:

- **Feature File:** High level description of a software feature / test scenario(s).
- **Scenario:** Used to describe specific test scenario(s).
- **Given:** Describes the pre-requisite for given test scenario(s).
- **When:** Describes an event or action.
- **And:** Provides a logical AND condition between statements.
- **Then:** Used to describe an expected outcome.

FEATURE

CASH WITHDRAWAL

- _____
- _____
- _____

*Gherkin
Syntax*

FEATURE: Cash Withdrawal

Scenario: Attempt to withdraw cash
using an incorrect pin

Given I have \$50 in my account

When I enter an incorrect pin code

Then I should not be able to
withdraw any money

And the card should be returned
